Experience

Technohertz technologies PVT. LTD

Sep 2024 – Feb 2025

Software Tester

Baner, Pune

- **Testing Fundamentals:** Knowledge of SDLC, STLC, Bug Life Cycle, and test case creation.
- **Types of Testing:** Functional, Regression, Smoke, Sanity, Regression testing, and Integration Testing.
- **Test Case Writing:** Creating and executing test cases based on requirements.
- **Bug Reporting:** Using tools like JIRA, or Excel.
- **Basic SQL Knowledge:** Ability to run queries for database validation.
- **Basic API Testing:** Using Postman to send requests and validate responses.

Projects

1) ITC Gurukul Elevate

ITC Gurukul Elevate is a comprehensive platform designed to facilitate seamless management of training and assessments. It serves as a centralized system where administrators can manage trainers and trainees, and trainers can create and evaluate assessments. The platform promotes streamlined learning, performance tracking, and recognition of top performers.

Key Features:

- **Admin Features:** -Trainer Management: - Add, update, or remove trainers. Assign specific roles and permissions.
- **Trainee Management:** -Add and manage trainee profiles. Assign trainees to relevant trainers.

2) Skoda Auto Volkswagen India Private Limited

The Skoda Auto Volkswagen India Private Limited (SAVWIPL) project is a unified mobile and web application designed to streamline communication, engagement, and operational efficiency for SAVWIPL employees. This platform integrates various applications and modules into a single, user-friendly interface, fostering a connected and interactive employee experience.

Web Portal: User Management: Admin dashboard for managing user accounts, roles, and permissions. Data Analytics and Reporting: Real-time monitoring and reporting on app performance, user activity, and system metrics. Deployment Tools: Tools to trigger, monitor, and rollback deployments of the mobile app in containerized environments. Notifications and Alerts: System to send operational updates, alerts, and error notifications to the admin team.

Mobile App: User Authentication: Secure login with multi-factor authentication and SSO integration. Containerized Features: Enhanced scalability and performance using containerized services. Personalized Dashboards: User-friendly dashboards tailored to user roles and preferences. Offline Access: Cached data for offline functionality, with seamless synchronization when online. Push Notifications: Alerts for updates, new features, and other critical information. Real-Time Updates: Dynamic updates without requiring full app downloads, leveraging containerized micro services.

Tools and Technologies

Testing Tools: Selenium, JIRA, Postman

Programming Languages: Java

Database Tools: MySQL, SQL Server

Certificate

Certified Software Tester (CST) – IT Preneur (2024)
