Objective

Dynamic Software Developer with over a year of experience at Alstonia Consulting LLP, specializing in Finacle scripting, full-stack development, and database management. Eager to leverage strong problem-solving skills and technical expertise in a challenging role within the IT & CS industry. Passionate about emerging technologies and dedicated to contributing to innovative projects.

Professional Summary

Proactive and versatile Software Developer with expertise in Finacle scripting, full-stack development, and database management (SQL, PostgreSQL, MongoDB). Experienced in microservices architecture and agile methodologies. Proven ability to deliver customized solutions for banking software, project management systems, and mobile application APIs. Committed to leveraging emerging technologies to drive impactful results.

Professional Experience

Alstonia Consulting LLP

Software Developer | Nov 2023 – Present

- Worked on IPPB Bank Project, focusing on Finacle scripting, frontend, backend, and database integration using SQL, PostgreSQL, and PL/SQL.
- Developed multiple menus and customized solutions for banking software, enhancing user experience and operational efficiency.
- Created JAR files in Java, contributing to banking software functionalities and optimizations.
- Gained hands-on experience in shell scripting for automation and system administration tasks.
- Involved in Aadhaar services development, including biometric OTP generation, ensuring secure and efficient authentication processes.

Pure and Cure Healthcare Pvt. Ltd. (Akums Pharmaceuticals Pvt. Ltd. Plant)

Documentation and Data Analyst | Feb 2020 – Feb 2021

- Managed documentation and data analysis tasks, ensuring accuracy and compliance with industry standards.
 - Organized and maintained essential records for efficient workflow and data retrieval.
 - Assisted in streamlining data management processes, contributing to operational efficiency and productivity.
 - Collaborated with cross-functional teams for effective data communication and reporting.
-

Internship Experience

Alstonia Consulting LLP

Intern – Finacle Developer (CBS Customization) | Nov 2023 – Feb 2024

- Worked on Core Banking System customization, gaining valuable experience in financial software development.
- Utilized Finacle scripting and PL/SQL for enhancing CBS functionalities.

Graphic Era Hill University

Intern – Deep Learning | March 2023 – June 2023

- Gained foundational knowledge in deep learning algorithms and neural networks.
 - Worked with Python and TensorFlow for building and training neural network models.
-

Certifications & Achievements

- **Internship Certifications:**
 - Alstonia Consulting LLP – Finacle Developer (CBS Customization)
 - Graphic Era Hill University – Deep Learning

Educational Background

- **Graphic Era Hill University**
Master of Computer Applications (MCA) | 2021 – 2023
 - **Shri Dev Suman Uttarakhand University**
Bachelor of Science in Information Technology (B.Sc. IT) | 2017 – 2020
 - **Lal Bahadur Shastri Institute, Dehradun**
Diploma in Computer Science | Completed in 2015
 - **Uttarakhand Board**
Intermediate (PCM) | Completed in 2017
High School | Completed in 2015
-

Technical Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6+)
 - **Backend:** Finacle Scripting, Java
 - **Databases:** SQL, PL/SQL, MongoDB, PostgreSQL
 - **APIs:** RESTful API Creation, External Service Integrations
 - **Version Control & Tools:** Git/GitHub, Postman
 - **Servers & Tools:** JBoss, PuTTY (Unix), WinSCP
 - **Reports:** Jasper Reports using I-Report Tool
 - **SDLC Models:** Agile, Waterfall
 - **Other:** Project Management, Logic Building, Microsoft Office Suite
-

Projects

IPPB Bank Project (Finacle Customization)

- Developed multiple menus and customized solutions using Finacle scripting, applying Maker-Checker logic to enhance security.
- Created and automated complex PL/SQL queries and procedures for financial data analysis, reporting, and routine operations.
- Designed and managed API scripts to integrate Finacle with external services (MATM, CBS).
- Built systems like Cash Report and Bulk Upload Module to automate data handling and improve operational efficiency.
- Developed detailed Jasper Reports using I-Report for business analysis and decision-making.

Aadhaar Services Integration

- Built solutions for Aadhaar-based biometric OTP generation, enhancing authentication processes.

API Development for Mobile Applications

- Created RESTful APIs to enable seamless communication between mobile applications and backend services.
- Ensured high performance and security through effective data validation and error handling.

JAR Development for Banking Software (Java)

- Developed JAR files to enhance banking software functionalities, ensuring smooth integration with existing systems.
 - Utilized Eclipse for scalable and maintainable application architecture.
-

Languages

- English – Proficient
- Hindi – Native
