-

PROJECT

Project Name: Insurance Transaction CMS

Domain Name: Insurance

Project Description:

This application was developed for insurance company usage. It provides information regarding the services and their policies. It also provides options like available policies and their benefits, terms and conditions, new schemes, etc. It provides information for different types of policies, like vehicle insurance, life insurance, home insurance, health insurance, and children's insurance.

Roles & Responsibilities:

- Actively involved in the Requirement gathering for the enhancements to the existing project.
- Analyze the program to identify the code changes as per the business requirements.
- Developing business logic layer by implementing OOPS concepts, Collection using C#.
- Responsible for code enhancements, code optimization and bug-fixing.
- Developed Web API for CRUD operations with HTTP verbs GET, POST, PUT and DELETE by using Entity Framework.

Project name: Shophaven

Domain name: E-Commerce

Project Description: -

The e-commerce project involves web-based applications that provide retailer services of electronic products. The web application provides services like categories of various electronics, the purchase of electronics, and the location of various electronic stores that supply products at retail value. The client can access the entire categories of electronic items listed, previous purchase history, as well as nearby retail outlet details.

Roles & Responsibilities:

- Involved in business meetings for requirement gathering and understanding the system needs.
- Developed code in Model, View, and Controller for building the Asp.Net Core MVC application.
- Developed Controllers and Action methods as per business logic.
- Created REST API using ASP.NET Web API and C#.
- Used Postman to execute the rest client calls.

EDUCATION

Bachelor of Engineering.

2014 - 2020

Savitribai Phule Pune University (SPPU).
