OBJECTIVE

Developer with nearly 3 years of experience delivering innovative solutions for Banking Domain clients. Proficient in SQL Server, ASP.NET Core, MVC, Web API, and Classic ASP with VBScript. Skilled in developing and optimizing modern and legacy applications, focusing on performance tuning, scalability, and client satisfaction. Improved database response times by 40% through query optimization and indexing strategies.

EXPERIENCE

Project Engineer – Wipro Limited Banking and Finance domain

April 2022 - Present - Pune, In

- Proficient in optimizing database performance through advanced SQL query techniques, enhancing the efficiency of stored procedures and functions to meet high-demand application requirements.
- Developed user registration and login functionalities as per client requirements using .NET technology and C# language. This included integrating with SQL Server to manage and retrieve user details.
- Designed and enhanced features for web applications, ensuring robust functionality and seamless user experiences.
- Experienced in On-Call Support, handling incident management to ensure timely issue resolution with minimal business impact.
- Developed and optimized complex SQL queries resulting in a 50% increase in performance. Created and optimized SQL procedures and functions leading to 30% better efficiency of the system.
- Monitored job executions in Active Batch scheduler, generate client reports on successes and failures, coordinate with technical team and support teams to resolve issues promptly to maintain system reliability.
- Work in a production environment, ensuring minimal impact on business operations while implementing incident resolution and root cause analysis for recurring issues.
- Performing regular tasks that include cloning, pulling the repositories, branching and merging.
- Resolved performance bottlenecks by tuning joins, subqueries, and filtering conditions, ensuring faster data retrieval.

Intern – Phenom People

Sep 2021 – Nov 2021 - Remote

- Collaborated extensively on HRM and CRM applications, specializing in job and gig creation within the portal. Ensured adherence to client expectations by validating if requirements were met effectively. Reported new bugs promptly to senior team members based on incident reports and actively collaborated with them to resolve issues.
- Developed and executed comprehensive test cases for critical features, ensuring thorough issue resolution validation.
- Actively participated in daily scrum calls, contributing to agile project management and continuous improvement cycles.

CERTIFICATES

- AZ - 900 Microsoft Azure Fundamentals Certification
- DP-900 Microsoft Azure Data Fundamentals Certification

SKILLS

.NET	C#	MySQL	Classic ASP
Azure	Gitlab	VB Script	Performance tuning

EDUCATION

Bachelor of Engineering - Prof. Ram Meghe Institute of Technology & Research

2017-2020
