Dot Net Developer with 2 years of experience in software development using .NET technologies. I am highly skilled in developing innovative and scalable web applications focusing on user experience. I have an in-depth knowledge of software engineering and am well-versed in ASP.NET CORE and building back-end web applications.

PROFESSIONAL SUMMARY:

- Experience in Software Development Life Cycle SDLC involving Requirement Gathering, Analysis, Logical Physical Architectural Modeling, Design, Development, Testing, Implementation, and Production Support.
- Advanced experience in developing Web and Client/Server Applications based on Microsoft .NET Technologies and implementing N-Tier Architecture.
- Expert in designing and developing web and windows-based applications using ASP.NET Core, C#, Entity Framework, Microservices, Web Services.
- Knowledge in Object Oriented Programming (OOPS) Concepts including Inheritance, Abstraction and Polymorphism.
- Extensive front end and backend development experience working with .Net Framework 4.8, Visual Studio.NET 2022/2019.
- Worked with Console applications, Windows applications, ASP.NET Web Forms, State Management, Caching, Securing ASP.NET Web Applications.
- Good experience in Exception Handling, Debugging and tracing by which the whole picture of application runtime behavior can be seen and analyzed more efficiently.
- Experience in designing and developing Databases in SQL Server 2022 which includes the development of Stored Procedures, User Defined Functions.
- Able to work as a team player as well as individually. Highly organized, dedicated with a positive attitude along with the strong analytical and troubleshooting skills.

SKILL SET :

WEB	.NET FRAMEWORK 4.8/4.7, ASP.NET, WCF, WEB SERVICES, JSON, ASP.NET WEB API, AZURE
BACK-END	C#
SERVER	SQL SERVER 2022/19
FRAMEWORKS	ASP.NET CORE, MVC, ENTITY FRAMEWORK
SERVICE ORIENTED ARCHITECTURE (SOA)	WINDOWS COMMUNICATION FOUNDATION (WCF), .NET WEB SERVICES
OPERATING SYSTEMS	WINDOWS 10/11

PROFESSIONAL EXPERIENCES:

Role: Software Engineer
Company: Ram Antivirus Pvt Ltd
January, 2024 – Present

Description: Ram Antivirus is a software development company in India. It helps you to create everything from small websites to large enterprise-class applications. It's premium technology, which helps programmers to create dynamic websites. Our skillful and experienced developers fulfill your software development requirements at any level of customized web application services.

Responsibilities:

- Build and maintain web applications using ASP.NET technologies like Core.
- Design intuitive and responsive user interfaces.
- Connect with third-party services and libraries.
- Collaborate with front-end technologies (HTML, CSS, JavaScript) for a seamless user experience.
- Integrated with backend services using WCF or REST APIs to fetch and update data, ensuring smooth communication with external systems.
- Develop and manage databases with tools like Entity Framework and SQL Server.
- Create and enhance SQL queries for better performance.
- Create and integrate RESTful or SOAP APIs.
- Ensure secure data communication and implement authentication protocols.
- Create and update technical documentation for applications and workflows.
- Document APIs for ease of understanding and use by others.

Role: Software Engineer
Company: CentraLogic Consultancy Pvt Ltd
March, 2023 – November, 2023

Description: CentraLogic is a software development company in India. The company continually embraced cutting-edge technologies, staying at the forefront of industry trends. company collaborates with stakeholders to define project objectives, scope, and deliverables. Our experts create detailed project plans, including timelines, resource allocation, and risk assessments. We enforce quality standards throughout the project lifecycle.

Responsibilities:

- Participated in requirement gathering sessions with the client and prepared/modified the requirements in the Requirement Specification document using UML.
- Implemented Design and Concepts data modeling to analyze and define data requirements to support business requirements.
- Created user interfaces using ASP.NET Web forms and Web Server controls. Navigation menus were implemented using Tree and Menu Controls and Custom/User Controls in ASP.NET.
- Coded the Business Logic layer and Data Access layer using C# .NET.
- Used HTML, CSS and JavaScript to give look and feel to Web pages using ASP.Net.
- Worked on ASP.NET State management, using Sessions and ASP.Net Caching features using Output Cache.
- Develop and manage microservices architectures.
- Extensively used ADO.NET classes provided by the .NET Framework 4.8 for database connectivity.
- Developed data access assemblies in C# to connect to SQL Server database and isolated data access logic from the business layer and front end by defining several strongly typed datasets.
- Implemented Forms-based Authentication to authenticate the users.
- Written SQL Queries and stored Procedures.

EDUCATION:

COLLAGE : INDIRA COLLEGE OF COMMERCE AND SCIENCE, PUNE

DEGREE : Masters in Computer Science (MSc)

CGPA : 9.2

PASS OUT : June 2023

COLLAGE : COMMERCE MANAGEMENT AND COMPUTER SCIENCE COLLEGE, NASHIK

DEGREE : Bachelors in Computer Science (BSc)

PERCENTAGE : 76.20 %

PASS OUT : May 2021
