- **Frontend:** HTML5, CSS3, Bootstrap
- **Databases:** SQL Server, Database Design, Stored Procedures
- **Tools:** Git, Visual Studio, Teams, Agile Methodologies

Project

Online Leave Management System

- Created a web application to streamline employee leave applications and approvals
- Employees can submit leave requests, and managers can approve or reject them.
- Implemented user roles: Admin, Employee, and Manager with separate dashboards.
- Built using ASP.NET Core MVC, C#, Entity Framework, and SQL Server.
- Included features like leave balance tracking, history view, and email notifications (optional).
- Focused on clean UI using Razor Pages and basic front-end validation.
