SUMMARY

Self-motivated and versatile professional with 10+ years of experience as a WordPress website developer, GeM portal consultant, and real estate project handler. Skilled in building responsive websites, managing government e-marketplace operations, and supervising on-site real estate projects. Proficient in digital marketing strategies, content creation, and the use of AI tools for automation and client support. Strong in multi-tasking, client communication, and delivering results across digital and on-ground platforms.

WORK EXPERIENCE

Ready multi Service Private Limited

Jan 2019 - Present

- I have successfully handled multiple roles including WordPress website development, GeM portal consultancy, and real estate project coordination. I have designed and developed over 20 responsive, SEO-optimized WordPress websites using tools like Elementor and WooCommerce for various clients and businesses. Alongside this, I managed end-to-end GeM portal operations such as seller registration, product listing, bid management, and order processing in compliance with government norms. Additionally, I have been actively involved in real estate projects, overseeing residential and commercial site work, coordinating with contractors, managing budgets, ensuring timely execution, and handling official documentation. My work reflects strong multitasking skills, client management, and a blend of digital and on-site project handling experience.

Jun 2017- Dec 2018

SSIT (WordPress website developer)

- Developed and maintained dynamic, responsive WordPress websites for college departments, events, and student clubs.
- Customized WordPress themes using HTML, CSS, and PHP to meet specific design and functional requirements. Tools & Tech Used:
