

Rohit Rewatkar

.NET Backend Developer with 2+ years
7741942189 | rohitrewatkar382@gmail.com

Objective

I seek challenging opportunities where I can fully use my skills for the success of the organization.

Experience

- Xceller IT Services** Jan 2023 - Jun 2023
.NET Intern
• Built projects using ASP.NET MVC, Windows Forms.
Developed basic applications using C#.
- Infimetrics Solutions** Sep 2023 - Dec 2023
Jr. Software Developer
• Built dashboard and reporting modules using ASP.NET MVC.
• Contributed to UI and backend improvements.
- Link Ideas Technology Pvt. Ltd** Dec 2023 - Aug 2024
Jr. Software Developer
• Worked on ERP modules like Purchase and Complaint Management.
• Developed backend logic using ASP.NET MVC, C#, LINQ.
• Assisted in debugging and enhancing code performance.
- Figment Global Pvt. Ltd** Aug 2024 -
.NET Developer
• Developed secure and scalable REST APIs using ASP.NET Core (v8) for tax filing systems.
• Built console-based automation tools using RestSharp for GSP integration, ITAT case syncing, and API workflows.
• Integrated WCF services into .NET Core applications.
• Worked with Docker for containerization and Redis for caching/session tracking.
• Handled scheduled background jobs using console apps.
Key Technologies: ASP.NET Core, .NET 8, C#, RestSharp, WCF, Docker, Redis, Console Apps, SQL Server

Education

- Hislop College, RTMNU – Nagpur** 2019 – 2022
Bachelor of Commerce in Computer Applications (BCCA)
9.3

Skills

- ASP.NET Core
- ASP.NET MVC
- C# .net

Projects

- Notice cpc**

The Notice CPC project is a centralized portal designed to automate and streamline the handling of Income Tax Notices, compliance communications, and related document submissions (e.g., Form 15CA, 26AS, ITAT). It provides real-time tracking, automated

- Gst cpc**

 My Contributions:

- Developed API integrations with GSTN/GSP services for GSTIN verification, PAN lookups, and 2A/2B data ingestion.
- Designed reconciliation logic for identifying matching, unmatched, and excess ITC using LINQ and stored

procedures.

- Built reusable components for JSON input/output parsing and error handling using RestSharp.
- Implemented Redis-based caching layer for session and token handling.
- Built Dockerized microservice for PAN-to-GST mapping with retry logic and logging.
- Created audit trail and logging for all critical API interactions.

- **Litp sales**

Here's a professional write-up for your ERP Project that you can use in your resume or documentation:

✅ Project Name: ERP Automation System

Client: Figment Global Pvt. Ltd.

Role: Backend Developer (.NET Core)

Tech Stack: ASP.NET Core (.NET 8), MVC, SQL Server, Redis, RestSharp, Docker, JavaScript, WebSocket, Quartz.NET

🔑 Project Description:

The ERP Automation System is a comprehensive enterprise-level platform built to automate and manage operations across departments like Finance, HR, Inventory

- **Vendor cpc**

- Vendor Master Management:

- Stores vendor profiles, rental contracts, billing terms, and tax deduction information.

- Scheduled Rent & Bill Reminders:

- Background jobs automatically check contract dates and trigger reminders via email and WSS in real time.

- TDS Deduction Tracker:

- Tracks tax deductions based on rent/payment thresholds and generates summaries for reporting.

- Notification Engine:

- Uses Quartz.NET to schedule daily and monthly jobs, pushing real-time notifications via WebSocket and sending email alerts.
