EXPERIENCE

YUDIZ SOLUTIONS PVT LTD

April 2023 - Till date

- Developed custom WordPress themes and plugins tailored to specific client requirements.
- Created RESTful APIs to enable seamless communication between web applications and databases.
- Utilized AJAX and JSON to enhance website interactivity and deliver a smoother user experience.
- Built responsive front-end components using HTML, CSS, JavaScript, React.js, and jQuery.
- Developed and implemented secure, scalable web application architecture using JavaScript, React, and Redux.

PROJECTS

Acoustic Office

- Developed a custom WordPress website focused on promoting acoustic pods, soundproof booths, and office furniture for modern workspaces.
- Implemented Custom Post Types to efficiently manage products like pods, booths, and furniture categories.
- Optimized content structure and metadata for SEO and fast loading speed, improving Google Search visibility.

Swiss Cars

- Developed a car rental platform for Swiss-based customers using a custom WordPress theme.
- Integrated WooCommerce to manage car booking, rental duration, pricing, and availability.
- Designed and built custom Elementor templates to create high-conversion landing and booking pages.
- Customized WooCommerce to support rental-specific logic, including pick-up/drop-off times and car categories.

Agent Verse

- Built a modern AI tools and feature listing platform using WordPress as a headless CMS with REST API integration.
- Developed the frontend using Next.js and Tailwind CSS, ensuring high performance, SEO optimization.
- Created and managed Custom Post Types (CPT) in WordPress to organize AI tools, features, categories, and details efficiently.
- Integrated dynamic content from WordPress via REST API, enabling real-time updates on the frontend without manual deployment.

RR Kabel

- Developed a custom WordPress website for RR Kabel to showcase electrical products like wires, cables, and accessories with a sleek black-themed UI.
- Integrated REST API to dynamically fetch and display product data, reducing manual effort and improving scalability.
- Created Custom Post Types (CPT) to manage various product categories and technical specifications effectively.
- Built a custom WordPress theme tailored to RR Kabel's branding for a unique, professional online presence.

WP Contact Form 7 DB Handler (Plugin)

- WP Contact Form 7 DB Handler is a comprehensive plugin designed to enhance the functionality of the popular Contact Form 7 plugin for WordPress.
- Organize submissions according to the specific contact forms created, ensuring efficient tracking and management.
- Filter submissions based on specific date ranges, allowing for precise analysis and management of form submissions over time.
- Export form submissions data in CSV format for further analysis, reporting, or integration with external tools and platforms. you can also export it with customised view.
