PROFESSIONAL EXPERIENCE

Zentech Info Solutions Pvt Ltd.

**Client Name: Aditya Birla Health insurance,
JUNIOR SOFTWARE DEVELOPER**

September 2022 – May 2025 | Mulund, INDIA

- 2 Years 8 months

Developed and designed web UI pages according to project requirements and specifications. Implemented responsive design principles to ensure optimal user experience across various devices and screen sizes. Collaborated with the development team to integrate front-end interfaces with back-end systems, ensuring seamless data flow and functionality. Conducted thorough testing and debugging of web pages to identify and resolve issues, ensuring a smooth and error-free user experience. Actively participated in team meetings and discussions to brainstorm ideas, share progress updates, and address challenges. Assisted in the documentation of project requirements, design specifications, and development processes.

PROJECTS

TMS(Test Management System), Web Application

September 2022 – July 2024

Overview: Project was related to talent acquisition with three module Customer, Employee and Manager.

Technologies Used:

- **Language:** C#
- **Database:** SQL Server
- **Framework:** ASP.NET 4.8
- **Frontend:** HTML, CSS, Javascript

Role: Served as a key developer responsible for front-end using HTML and CSS and back-end development using HTML and CSS, database design. Collaborated with the team to gather requirements and implement custom features, or give all-time support to the TMS

Achievements:

- Successfully delivered a user-friendly and scalable web application within project deadlines, resulting in improved HR efficiency and employee satisfaction.

TeamSize: 3

HL Intermediary, (WCF SERVICE)

Overview: I had created a service for HL to store the data of agents.

Technologies Used:

- **Language:** C#
- **Database:** SQL Server
- **Framework:** ASP.NET 4.8

Role: Served as a key developer responsible for back-end development using C#, database design. Collaborated with the team to gather requirements and implement custom features.

Achievements:

PROFILE SUMMARY:

With 2 years and 8 months of hands-on experience in software development, I am a proficient C# developer specializing in web technologies such as ASP.NET and ASP.NET WCF Service. My expertise extends to frontend development using HTML, CSS, and JavaScript, enabling me to create dynamic and responsive user interfaces.

- Successfully delivered a user-friendly and scalable WCF Service within project deadlines, resulting in improved efficiency and Client satisfaction.

TeamSize: 1

SaveParty (Console Application)

Overview: I had created a console application for the Jarvis application to push the IMD code details of HL data. Through this console application, I called the API and pushed the IMD code in Jarvis. .

Technologies Used:

- **Language:** C#
- **Database:** SQL Server
- **Framework:** ASP.NET 4.8

Role: Served as a key developer responsible for back-end development using C# , database design. Collaborated with the team to gather requirements and implement custom features.

Achievements:

- Successfully delivered a user-friendly and scalable Console Application within project deadlines, resulting in improved efficiency and Client satisfaction.

TeamSize: 1

YesBankPDFPush

Overview: I had created a console application for Yes Bank to push policy documents through SFTP (Secure File Transfer Protocol) and also send a client email notification of a successfully sent PDF list.

Technologies Used:

- **Language:** C#
- **Database:** SQL Server
- **Framework:** ASP.NET 4.8

Role: Served as a key developer responsible for back-end development using C# , database design. Collaborated with the team to gather requirements and implement custom features.

Achievements:

- Successfully delivered a user-friendly and scalable Console Application within project deadlines, resulting in improved efficiency and Client satisfaction.

TeamSize: 1

OmniDocs(WCF Service)

Overview: I had created a service for internally use to store the documents of policy or any other documents on omnidocs Application there have three services OmniUpload, OmniSearch and OmniDownload.

Technologies Used:

- **Language:** C#
- **Database:** SQL Server
- **Framework:** ASP.NET 4.8

Role: Served as a key developer responsible for back-end development using C# , database design. Collaborated with the team to gather requirements and implement custom features.

Achievements:

- Successfully delivered a user-friendly and scalable

WCF Service within project deadlines, resulting in improved efficiency and Client satisfaction.
