Professional Experience

Excellon-DMS (Base Product)

Excellon-DMS is a comprehensive solution for multi-brand, multi-location automotive dealerships. It integrates modules for CRM, Sales, Procurement, Inventory, and Service to provide enhanced inventory management and financial control.

- Developed and maintained core modules to ensure smooth business operations and process integration.
- Created and implemented new features in the base product to improve performance and meet client requirements.
- Resolved development issues and optimized stored procedures to improve efficiency

Project (CLPL, Altigreen, Lectrix)

- Provided technical support and customization for client-specific projects such as CLPL (Classic Legends – Jawa/Yazdi Bikes), Altigreen, and Lectrix EV.
- Worked on backend development and enhancements using C# and SQL Server, modifying application logic based on client requirements.
- Customized modules and optimized stored procedures to improve performance and system efficiency.
- Collaborated with cross-functional teams to deliver timely solutions, feature updates, and bug fixes.
- Delivered ongoing production support, ensuring system stability and fast issue resolution within tight deadlines.
- Maintained proper documentation of changes, client requests, and technical solutions for future reference.
- Debugged and resolved development and production issues, ensuring system integrity and seamless operations.
