SUMMARY

I am a motivated web developer eager to leverage my skills in creating efficient applications. With experience in building user-friendly websites and a strong foundation in technologies like C# and .NET, I am keen to contribute to challenging projects that enhance operational efficiency and improve user experience. My goal is to continuously expand my technical abilities and make meaningful contributions in the field of web development

EXPERIENCE

Web Developer

Sthapatya Consultants (i) Pvt Ltd

12/2024 - 06/2025

- Developed and maintained features for Property Tax and Complaint Registration forms
- Enhanced user interfaces using HTML, CSS, and JavaScript for better usability and responsiveness
- Improved backend logic in C# for tax calculations, complaint tracking, and service workflows
- Handled data validation on both client-side and server-side to ensure clean citizen data
- Worked with SQL Server to create/modify stored procedures for tax billing and complaint data storage
- Coordinated with municipal IT teams to understand business rules and apply updates accordingly
- Debugged issues in production, performed root cause analysis, and tested fixes in staging environments

KEY ACHIEVEMENTS
