SUMMARY

I am a highly motivated and results-driven .NET Software Developer with 2.5 years of experience in the full software development life cycle. My proficiency includes ASP.NET Web API, Angular 12, and SQL Server, coupled with my ability to implement Agile methodologies. I am eager to leverage my strong technical skills and problem-solving abilities to contribute to innovative projects and drive organizational growth

EXPERIENCE

Software Engineer

Valcre Solution Pvt. Ltd

📅 03/2024 01/1970 📍 Surat, Gujarat

Software development company specializing in web applications

- Developed a workflow-based gift approval system supporting multi-level authorization
- Focused on approval logic implementation, including time-based escalation and exception handling
- Worked on frontend UI enhancements using Angular and PrimeNG to improve user experience
- Integrated backend services using ASP.NET Core and Dapper for seamless data flow
- Ensured accurate business rule enforcement by collaborating with product owners and QA teams
- Created role-based access control (RBAC) to manage different user permissions across approval stages
- Wrote unit tests to validate approval scenarios and edge cases
- Participated in deployment cycles, handled staging/testing releases, and supported post-release bug fixes
- Designed email notification workflows for pending approvals and escalations

Software Engineer

BitHub Technology Pvt. Ltd

📅 02/2023 03/2024 📍 Surat, Gujarat

Technology solutions provider focused on software development

- Contributed to the development of ERP modules including Inventory, Production, and Invoicing
- Developed backend APIs using ASP.NET Core with Dapper and ADO.NET for high-performance data handling
- Built responsive UI components in Angular 12 with dynamic form controls and reusable templates
- Integrated third-party APIs such as SMS/email for alerts, and GST APIs for compliance
- Refactored legacy modules to follow SOLID principles and clean code standards
- Enhanced database performance by creating stored procedures, views, and indexes in SQL Server
- Performed manual testing and defect resolution, including writing test cases and verifying bug fixes
- Managed DevOps tasks including deployment, version control via GitHub, and CI/CD setup in Azure DevOps
- Participated in Agile practices—daily scrums, sprint planning, retrospectives, and demo sessions
- Maintained technical documentation for APIs, services, and database design for future scalability
