Project Summary:

Description:

It is Web application. The goal of the project is to maintain all activities. My Project is Education Based Domain Project and this project basically making the interview process easy which is happening in colleges. This project is a replica of the manual process which we follow during the On campus interview. The project involves the key roles i.e. TPO , HR, Student, Admin. In this Project if any company is looking for some developer and they have some vacancies , TPO is creating the credentials for that company HR and using that credentials HR is Pushing the job along with all the criteria and description and that job post is reviewed by the TPO and it will be broadcasted to the Student and Student can apply for those job according to criteria. Along with we are maintaining the history and feedback about whole interview process. Student also can see the Offer Letters after the Selection. Basically we giving a solution to handle each and every Manual process which college is doing for the Interview Process Activity.

Responsibilities:

- ☞ Actively participate in daily scrum meeting.
- ☞ Development of applications Involved in coding.
- ☞ Handling Defects and enhancements raised by customers.
- ☞ Development and handling databases.
- ☞ Analysis / Design / Development / Testing of the application.
- ☞ Involved in implementing task in MVC using C#, HTML, CSS, JavaScript.
