NAGPUR, INDIA | P: 7875718546 | rajkumargalbale1995@gmail.com | [LinkedIn](#)

SUMMARY

Experienced Full Stack .NET Web Developer with expertise in ASP.NET Core, MVC, Web Form, Identity Framework, SQL Server and MySQL. Skilled in building responsive and dynamic web applications using HTML, CSS, Bootstrap, JavaScript, jQuery, and AJAX for creating interactive user experiences. Strong understanding of backend development with ADO.NET, Entity Framework Core, and application performance optimization. Adept at troubleshooting, debugging, and deploying scalable web solutions. Passionate about delivering robust, efficient, and user-friendly applications.

SKILL

Language	C#
Framework	ASP.NET Core, ASP.NET MVC, Entity Framework Core
Web Technology	HTML, CSS, Bootstrap, Javascript, JQuery, Ajax
Database tools	SQL Server, MySQL

PROFESSIONAL EXPERIENCE

Advanced Software Development Research Center (ASDRC) Nagpur.

January 2025 – Present

- **Experienced in Full Stack Web Development** using ASP.NET Core, MVC, HTML, CSS, Bootstrap, JavaScript, jQuery and Ajax for building dynamic and responsive web applications.
- **Developed and debug two web applications** using ASP.NET Core MVC architecture, ensuring clean separation of concerns and maintainable code.
- **Proficient in frontend development** with expertise in crafting interactive and user-friendly interfaces using Bootstrap, jQuery, and AJAX for improved user experience.
- **Worked extensively with Entity Framework Core** to efficiently interact with relational databases, perform CRUD operations, and optimize database queries.
- **Skilled in database design and management** with expertise in SQL Server and MySQL, implementing efficient schemas for data storage, writing store procedure and retrieval.

PROJECTS

PROJECT 1: MyOffice

- Designed and developed a full-stack web application for managing employee and admin processes, including user roles, attendance, leave requests, holidays and internal communications etc.
- Built using ASP.NET Core MVC for the backend and MySQL for database operations.
- Created responsive and user-friendly frontend using HTML, CSS, Bootstrap, JavaScript, jQuery and Ajax.
- Implemented secure login, role-based access control, CRUD operations for employee and admin modules.

PROJECT 2: NRIPlanet

- Developing a service-based web app for NRIs to manage immigration, utility bills, documentation, and property services.
- Using ASP.Net Core MVC and Entity Framework Core for backend development and SQL Server, with role-based access for admins, consultants and users.
- Created responsive and user-friendly frontend using HTML, CSS, Bootstrap, JavaScript, jQuery and Ajax.
- Implementing features such as service request, document tracking and appointment scheduling with a responsive Bootstrap Interface.
