Summary

A highly motivated and results- oriented **.NET Developer with 3 years of experience** in designing, developing, and implementing web applications and system solutions. Proven expertise in .NET technologies, including ASP.NET Core MVC, Web API, Entity Framework Core, and C#. Adept at building high-quality, maintainable code and optimizing database performance. Strong analytical and problem-solving skills, with a passion for delivering innovative solutions in fast-paced, team-oriented environments. Seeking a challenging role where I can leverage my skills and experience to contribute to the success of a dynamic organization.

Experience

Global Business Infotech Solution

Dotnet Developer

Mar 2024 - May 2025

- Developed and implemented a Blinds Web Application using C#, .NET MVC Core, Web API, Angular18 and Entity Framework, resulting in a streamlined blind management process.
- Created an intuitive dashboard with login authentication and data visualization features for data monitoring and reporting, improving data accessibility and decision-making.
- Successfully implemented Jwt Authentication for enhanced security.
- Designed CRUD modules for managing customers, blind types, and roles, improving data management efficiency.
- Implemented import/export functionality in various formats, enabling seamless data transfer.
- Integrated email functionality for automated invoice and quotation notifications, improving customer communication and efficiency.
- Optimized database performance using Entity Framework and LINQ, resulting in faster data access and improved application responsiveness.

Sciedge Abstract

Junior .Net Developer

Dec 2022 - Aug 2023

- Designed and developed WinForms-based data entry software, streamlining data entry workflows for end-users.
- Automated the extraction of weekly data from various sources using batch processes, improving data processing efficiency.
- Integrated extracted data into structured databases, ensuring data consistency and accuracy.
- Optimized database queries, resulting in improved performance during data retrieval and reporting.
- Implemented robust validation checks, minimizing data entry errors and ensuring data quality.
- Tailored applications to meet specific client requirements, adding features like bulk data import/export and customizable reporting options.
- Collaborated with stakeholders to gather requirements and delivered solutions aligned with their operational needs.

Greenovative Energy Pvt Ltd.

Trainee .Net Developer

Sep 2021 - Dec 2022

- Designed and implemented complex stored procedures in SQL Server to manage meter energy consumption data, improving data processing efficiency.
- Designed and implemented complex stored procedures in SQL Server to manage meter energy consumption data, improving data processing efficiency.
- Optimized stored procedures for performance, ensuring efficient data retrieval and manipulation.
- Developed and deployed RESTful Web APIs using .NET technologies for seamless integration with external systems and data sources.
- Created APIs for real-time data access and interaction with meter energy consumption systems, facilitating accurate reporting and analysis.
- Ensured proper authentication and security mechanisms for the APIs to safeguard sensitive data.
- Collaborated with stakeholders to understand requirements for energy consumption tracking and reporting.

- Integrated APIs with internal and external data sources, ensuring real-time synchronization and availability of energy consumption data.
