SOFTWARE DEVELOPER

PROFESSIONAL SUMMARY:

- Experienced **.NET Developer** with **2+ years** of expertise in designing, developing, and deploying scalable applications and cloud-based solutions.
- Proficient in **.NET Framework, .NET Core, C#, ASP.NET MVC, RESTful Web APIs, and Microservices**.
- Adept at integrating APIs using **JavaScript, jQuery, and HttpClient** to ensure seamless communication between systems.
- Skilled in database operations with **SQL Server** and **Entity Framework** for efficient data management and optimization.
- Strong knowledge of front-end technologies including **HTML, CSS, Bootstrap, React.js, JavaScript, jQuery, and Ajax**.
- Demonstrated ability to deliver high-quality, maintainable solutions adhering to SOLID principles and Design Patterns.

EDUCATION

BCS from Pune University. 2024

EXPERIENCE

Currently working at **Codereach Software And Education Private Limited**

Jun 2023 to Present

PROJECTS

Project 1: Eye3 Web Application

Environment: .NET Core, C#, SQL Server, Entity Framework, MVC, HTML, CSS, JavaScript.

Description:

This application is the solution for the Vehicle Tracking System. It provides the different graphs, maps and reports to track the vehicle.

Responsibilities:

- Designed and developed interactive and user-friendly interfaces using front-end technologies to enhance user experience.
- Implemented core functionalities and features of the application using .NET framework and integrated backend services.
- Wrote and optimized database queries to ensure seamless data retrieval and storage operations.
- Collaborated with cross-functional teams to understand project requirements and deliver technical solutions on time.
- Conducted unit testing and debugging to maintain application quality and resolve any performance issues.
- Integrated APIs and third-party tools to expand the functionality of the application.
- Provided support during deployment, ensuring smooth transition and post-deployment maintenance.
- Documented project requirements, technical designs, and user manuals for future reference.

Project 2: Central Management System (CMS) (Web Application)

Environment: HTML, CSS, JavaScript, Angular. C#, .Net Core, Web API, MVC.

Description:

This web application is for managing vendor details, mostly used by a security system management where Agency,

Company and Vendor can login insert and update their details about devices, Panels etc. with their location details. Can

view Reports like about devices' status, events and images online Responsibilities Implementing process solution

Identifying and communicating the technical implementation requirements Participate in requirement analysis and meetings with business partners. Maintaining Dashboards with API .

Responsibilities:

- Developed and maintained the web application using .NET framework for efficient content management.
- Designed user-friendly interfaces to improve accessibility and navigation.
- Implemented backend services to manage data and ensure secure communication.
- Optimized database queries for faster data retrieval and storage.
- Collaborated with team members to gather requirements and deliver solutions.
- Conducted testing and debugging to ensure application reliability.
- Supported deployment and provided post-launch maintenance.

SKILLS

HTML	CSS	Bootstrap
JavaScript	jQuery	Angular
SQL	C#	ASP.NET
MVC	Entity Framework	Git
.Net Framework	.Net Core	Postman
