SUMMARY

With over 3 years of professional experience and deep expertise in .NET Core, C#, and JavaScript, I've led teams to deliver high-quality technical solutions that meet distinct customer requirements. My grasp of a broad spectrum of technologies has driven improved efficiencies and significant business outcomes, including optimization projects that achieved a notable reduction in system load times.

EXPERIENCE

Senior Dot Net Developer

Aventisia Technologies Pvt Ltd (contract)

📅 02/2025 - 07/2025 📍 Remote

Senior .NET Developer

Aloha Technology

📅 07/2022 - 02/2025 📍 Prabhavee Tech Park, Baner, Pune

- Architected and implemented a scalable .NET Core solution for a finance SaaS platform, boosting system efficiency by 25%
- Led a cross-functional team of 4 in the successful deployment of a major update, resulting in a 15% reduction in load times
- Created robust CI/CD pipelines using Jenkins and Ansible, automating deployments which decreased manual intervention by 40%
- Applied expertise in SQL Server to optimize database performance and achieve a 10% cost-saving in resource allocation
- Regularly consulted with clients to translate business needs into high-level project plans, ensuring alignment with strategic objectives
- Managed critical software updates and security patches, maintaining 99.9% uptime and enhancing customer trust

Full Stack Developer

Omtech Web

📅 01/2021 - 05/2022 📍 Surat

- Developed and maintained a suite of ASP.NET MVC web applications, improving code quality and maintainability by refactoring legacy systems
- Integrated React components into existing applications to improve user experience and page performance by over 30%
- Contributed to a 20% increase in application resilience by implementing Docker and Kubernetes in production environments
- Spearheaded the migration of a large database from SQL to a NoSQL architecture, enhancing scalability and flexibility
- Collaborated with product designers to prototype and iterate on user interfaces, driving an improved NPS score by 10 points

EDUCATION

Bachelor of Computer Science and Engineering

COETA

📅 08/2018 - 09/2022 📍 Akola

PROJECTS

Private Project

A ASP.NET based project scanning and storing data with the help of Android Application which is developed in Dotnet Xamarin, Usage of database Sql server WCF services and AWS for deployment. The ASP.NET now out of support so we converted that Project into blazor and it's android application into microsoft MAUI for better performance and long term support. we used latest technology for development.

Lottery Instant Tracker

Developed fully working E-COMMERCE tracking project for lotteries which are sold on shops, with payment integration of Authorize net. Developed its android application for scanning lotteries and tracking data of staff members on shop. Converted it into blazor and Microsoft MAUI cause of support of Microsoft. we used entity framework for security purposes and management purposes. Databases used for that Sql Server, Git and SVN for version control. boosted customer count for the client in last two years. here the link lotteryinstanttracker.com

Customer Portal

Played role of Senior Developer for management of project development of the is done in ASP.NET cause of DRY principal. we used whole working code for saving time and made fast delivery for the client.

Mac Rak

Solo development and management of the project. developed a website inventory management in windows web forms and the android application in xamarin for tablet used Sqlite for storing data on device cause of network issues having while measuring the frames for raks, Solved big ever problem the client have.

Byrne Dairy.

A inventory management project maintained in Dot net Xamarin for Android development. runs in local network and fully configurable app for network and inventory management. Technologies used SQL server, Xamarin, .Net Core 8 APIs for LTS. Solo developer Role played in this project.

React	MAUI	Xamarin	WebForms	WCF Services	
Soap Services	AWS	C/C++	Python	MVC	Blazor
Minimal API	Microservices	Git	SVN		

PROJECTS

Loksevasantha.org Organizational Website

A freelancing project of website for development of React website, showcasing their works and works of organisation, and receiving donations and chats for new joinee in organisation.

Aventisia Product

Aventisia is an automation platform that leverages a low-code/no-code (LCNC) approach to help users automate their daily tasks.

During your six months at Aventisia, you were involved in developing .NET Standard applications using .NET Core, indicating your role likely focused on the backend development and integration aspects of the platform. Your work would have contributed to building the underlying components that enable Aventisia's automation capabilities, potentially including connectors, custom actions, or core logic for task execution.
