hritikyemde123@gmail.com | 8602836106 | linkedin.com/in/hritik-yemde | github.com/HritikY18

Backend Developer specializing in scalable API development and robust backend architectures using MVC design pattern and RESTful principles. Proficient in system integrations and cross-functional collaboration, with a growing focus on backend technologies such as Node.js, Express.js, and MongoDB.

Skills

Languages/Frameworks: PHP, Laravel, SQL, C++ , JavaScript, Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB

Core Concepts: OOP Principles, MVC Architecture, REST APIs, Database Design

Tools: Git, Postman, Firebase, cPanel, hPanel

Soft Skills: Communication, Teamwork, Accountability

Experience

Backend Developer
Silversky Technology

Jan 2024 – Present

- Developed and maintained scalable Laravel backends for 10+ web/mobile apps using MVC architecture, RESTful APIs, and MySQL/PostgreSQL — ensuring clean separation of concerns and high maintainability.
- Developed secure APIs for frontend/mobile integration, integrating third-party services including Google Places, Firebase, OpenAI, ElevenLabs, ZeptoMail, MailerSend, Branch.io, and others.
- Delivered enterprise features: RBAC, geolocation-based logic, QR-based attendance, and dynamic admin dashboards (jQuery, Ajax, Yajra DataTables).
- Collaborated with frontend and QA teams in Agile environments and used Git for version control.
- Handled deployments using AWS (EC2, Elastic Beanstalk), cPanel, and hPanel — managing release processes and production environments.

Projects

Dental Experts

Healthcare staffing platform with shift management and multi-role dashboards.

- Engineered shift lifecycle (create, apply, approve, review, timesheet) with role-based dashboards.
- Integrated Google Places and MailerSend for onboarding; applied Spatie for permission control.
- Deployed on AWS EC2, EB, and S3 for scalability and uptime.

Guised Up

Social media and mental wellness platform for dynamic, anonymous interaction.

- Developed RESTful APIs for auth, profiles, posts, stories (24h), comments, follows, and reward points.
- Implemented content visibility controls; integrated FCM, ZeptoMail, and Branch.io.
- Designed a modular, scalable backend for performance and future extensibility.

Vokalite

Hyperlocal news platform for geotagged content sharing and discovery.

- Built APIs for posting location-based content with media, radius filtering, likes, bookmarks, and deep link sharing.
- Integrated FCM for geo-notifications and Google Maps for proximity logic.
- Implemented moderation tools: block/report (auto-delete after 3 flags) and full CRUD admin dashboard.

Education

Technocrats Institute of Technology, Bhopal
B.Tech in Computer Science (AIML)

July 2020 – July 2024
