PROJECTS

Departmental Internship Portal

- Developed Departmental Internship Portal using ASP.net, C# and SQL server with separate modules for website, student and HOD.
- HOD can register companies and manage internship vacancies and view student's certificates after completion of internship.
- While students can apply, upload certificate and raise helpdesk queries
- The system streamlines internship allotment and enhances communication between student and college HODs.

Registration Module using MVC Framework

- This mini project is a student registration management system built using ASP.NET MVC with ADO.NET featuring registration, login, profile update and password change functionalities.

- Visual studio
- Debugging & troubleshooting
- Basic knowledge of OOPs, SDLC

CERTIFICATIONS

- Full-Stack Dot Net Development

- It includes form validation, session management and SQL server integration for handling student data.

Online Student Complaint Handling System

- The Online Student Complaint Handling System, Built with ASP.NET, streamline the reporting and resolution of student complaints.
- It offers a transparent and efficient platform for managing academics, administrative and infrastructure issues, enhancing communication and student satisfaction.

Stock Management System

- Developed stock management system using 3 tier architecture BO, BLL and DAL to manage vendor, products, stocks and sales.
- Implemented secure admin panel with ADO.NET for CRUD operations and real time inventory tracking.

Hospital OPD Management

- Developed a Hospital Management System using .NET and SQL Server to streamline shift-wise patient registration and appointment, improving efficiency and wait times.
