PROFESSIONAL SUMMARY

Results-driven Senior Software Developer with 5+ years of experience in full-stack web development. Expert in ASP.NET , C#, VB.NET , and SQL Server with proven ability to design, develop, and optimize enterprise-level web applications. Demonstrated success in delivering scalable solutions across education, healthcare, and ERP domains. Strong background in database integration, UI/UX design, and payment gateway implementation. Professional developer with passion for high-quality software solutions. Known for successfully leading projects and delivering impactful results that align with business goals. Highly reliable team player with focus on collaboration and adaptability. Skilled in software architecture, coding, and agile methodologies.

CORE COMPETENCIES

Programming Languages

C#, ASP.NET, VB.NET, SQL, JavaScript, CSS

Frameworks & Technologies

.NET Framework, Angular, Bootstrap, jQuery

Database Technologies

SQL Server, T-SQL, Stored Procedures, Views, Functions, Database Optimization

Development Tools

Visual Studio, Visual Studio Code

Web Technologies

RESTful APIs, AJAX, JSON, XML, Web Services

Reporting Tools

iTextSharp, Telerik

Additional Skills

Payment Gateway Integration, OCR Implementation, Document Management, Agile Methodology

Accomplishments

- Successfully led 8+ enterprise-level projects from conception to deployment
- Improved system performance by 40% through database optimization techniques
- Reduced application development time by 25% through reusable component architecture

PROFESSIONAL EXPERIENCE

08/2023 – Present

Senior Software Developer

Web Technology

- Developed and optimized Integrated University Management System (IUMS) serving 10,000+ users
- Created Student Document Verification Module with OCR integration, reducing manual verification by 40%
- Designed Visitor Management System for PDKV University with role-based access control
- Implemented Pension Management Module with automated approval workflows and disbursement tracking
- Built Thesis Process Module enabling digital submission, review, and approval workflows
- Developed custom reporting solutions including gender-wise and caste-wise student analytics
- Integrated multiple payment gateways for fee collection and automated reconciliation
- Enhanced UI/UX across login portals resulting in 25% improvement in user engagement
- Developed Online Recruitment Management System (ORMS) for candidate application, shortlisting, and selection workflows

03/2022 – 07/2023	Senior Software Developer <i>Intellect Software Solution</i> - Managed the POD Management System, streamlining invoice assignments, proof of delivery (POD) verification, and delivery tracking to improve process efficiency. - Developed and implemented the Activity Billing Project, creating master records for technicians, workers, and equipment to ensure accurate billing and resource management. - Enhanced Ethanol Procurement System with automated ASN creation reducing processing time by 30% - Implemented workflow automation reducing manual intervention by 35%
10/2019 – 11/2021	Junior ASP.NET Developer <i>Inotro Multiservices Pvt. Ltd</i> - Developed NGO management systems for SVJV, JITO, and RVO organizations - Created education los processing system with automated email colifications - Implemented user autentication anc authorizationsing ASP.NET Identity - Automated CAP round workflows for ec.cational institutions - Debugged and deployed applications on GoDaddy hosting platform - Maintained 99% apo ication uptime through effective debugging and optimization

EDUCATION

2019 SGBA University	Bachelor of Engineering (B.E.) in Computer Science <i>College of Engineering and Technology, Akola</i> Grade: First Class (6.85 CGPA)
2014 Maharashtra State Board	Higher Secondary Certificate (H.S.C.) <i>Shivaji College, Akola</i> Percentage: (57.39%)

CERTIFICATIONS & ACHIEVEMENTS

- Web Design Certificate from MKCL
- Internship Certificate from BSNL
