PROFILE

Software Developer with 2+ years of experience in web application development, specializing in the Symfony framework. Skilled in building RESTful APIs, microservices, and integrating third-party services. Focused on crafting efficient, scalable, and maintainable code while collaborating with diverse Agile teams. Strong written, verbal, and interpersonal communication skills honed through experience working with onsite and remote teams.

WORK EXPERIENCE

TraceByte Private Limited | Bangalore SEP 2023- PRESENT
PHP Symfony Developer

Interview Platform - Epita - France

- Complete redesign of Rakoon, a web-based interview management portal aimed at improving user experience, functionality, and performance.
- Implemented dashboard to show interview status and manage student records.
- Integrated the Vonage Communication Video API platform to enable video interviews and communication
- The project was meticulously crafted using cutting-edge technologies, employing PHP 7.4 with Symfony 5.3 for backend development, complemented by React.js for the frontend.

Education Platform - Joinin campus - India

- Designed and developed an end-to-end web application using PHP Symfony 6.2, following modular microservices architecture to enhance scalability and maintainability. Implemented a secure and scalable document management system using AWS S3 buckets for efficient storage and retrieval of student-uploaded files.
- Developed dynamic RESTful APIs to support features such as real-time university/course search and student profile management. Integrated a powerful search mechanism for fast access to universities and programs. Built a robust admin panel using EasyAdmin to manage users, content, and system configurations effectively.
- Utilized Doctrine ORM for efficient data mapping and management, followed MVC architecture principles, and optimized API responses for performance. Empowered students to seamlessly explore and apply to overseas universities through a structured, user-focused experience.

E-learning Platform - Dreamsandglory - France

- Designed and developed an end-to-end web app using the PHP SYMFONY 5.6 Framework, enabling an e-learning platform with various PHP 8 MySQL topics.
- Redesigned the website to improve user experience, functionality, and performance.
- Dashboard implementation and management of the data for admin through easy admin
