## Experience

### Zinavo Private Limited

Web Developer

Apr 2022 - Present | Bangalore

Designed and developed enterprise-level web applications and eCommerce platforms for global clients using HTML, CSS, and JavaScript, ensuring high performance and responsive design.

Extensive experience with Content Management Systems (CMS) such as WordPress and Joomla to efficiently create, update, and manage web pages with custom themes and plugins.

Integrated front-end interfaces with backend APIs and actively debugged PHP scripts to ensure smooth data flow and functionality.

Implemented SEO best practices, including structured data and schema markup, to improve website visibility and search engine rankings.

Managed server-related activities such as hosting setup, DNS configuration, website deployment, and server migration.

Experience in production support by analyzing live issues, identifying root causes, and implementing timely fixes. Maintained production environments through regular patching, CMS upgrades, and ensuring high availability and stability.

Good knowledge on React.js for building dynamic user interfaces and experience in writing SQL scripts.

Interacted with clients to gather requirements, understand business needs, and design effective, user-friendly web applications.

Collaborated closely with designers, content creators, and cross-functional teams to deliver cohesive, user-friendly, and fully functional web solutions.
