SUMMARY

- Back-End Development: Developed and maintained scalable, modular web applications using PHP and MySQL.
- Front-End Development: Designed responsive and mobile-first interfaces using HTML5, CSS3, Bootstrap 5, JavaScript, and jQuery.
- Integrated various jQuery plugins and libraries, including Select2, Typeahead (Bloodhound.js), Crop.js, DataTables, SweetAlert, Toastr, Mustache.js, Intl Tel Input, and CKEditor.
- Implemented AJAX-based workflows and dynamic UI elements to enhance interactivity and performance.
- Improved performance using Gulp.js for task automation and CDN integration.
- Built dynamic visual dashboards using Morris.js and Chart.js for real-time reporting.
- Designed and developed custom CRM applications, WordPress portals, and internal tools.
- Participated in developing a CMS with WordPress that led to a 30% performance boost.
- Created and optimized stored procedures, functions, triggers, views, and complex joins in MySQL.
- Deployed CI/CD pipelines and server environments on platforms such as cPanel, Plesk, AWS Lightsail, Hostinger, and GoDaddy.
- Collaborated with front-end teams to integrate UI components using PHP and JavaScript.
- Troubleshoot and fixed security vulnerabilities to harden PHP-based applications.
- Ensured cross-browser compatibility, accessibility compliance, and a smooth UX across all devices.
- Stayed current with evolving web technologies and implemented best practices in both front-end and back-end development.

HOBBIES

- Reading Books
- watching youtube videos
