PROJECTS

May 2025- Nov 2025

Online Quiz Management System

- Designed and developed a dynamic Online Quiz Management System with an admin panel to create, edit, and manage quizzes, questions, timers, and correct answers.
Implemented automatic score calculation and real-time result display, ensuring secure data storage and smooth user experience using PHP and MySQL.
- Technologies:** PHP, MySQL, HTML, CSS, JavaScript, Bootstrap, jQuery

Online Voting System

- Developed a secure Online Voting System with user authentication and strict one-user-one-vote mechanism to prevent duplicate or fraudulent voting.
 - Designed an admin panel to create elections, manage candidates, and monitor voting activity efficiently.
 - Implemented real-time vote counting and result display, ensuring accuracy, transparency, and smooth performance using PHP and MySQL.
- Technologies:** PHP, MySQL, JavaScript, Chart.js, HTML, CSS, Bootstrap

Marriage Bureau Management Website

- Developed a dynamic Marriage Bureau website allowing users to create profiles, search matches, and send/receive interests based on preferences.
 - Built an admin panel to manage user profiles, approvals, subscriptions, and content moderation.
 - Implemented secure authentication, profile privacy controls, and database-driven matchmaking logic to ensure safe and efficient user experience.
 - Reduced CPC by 15.7% through effective keyword optimization, bid adjustments, and audience segmentation, increasing campaign cost efficiency. Increased clicks by 15.5G% and impressions by 5.88% by analyzing performance
- Technologies:** PHP, MySQL, HTML, CSS, JavaScript, Bootstrap, jQuery

PROFESSIONAL EXPERIENCE

Purple Page Three — PHP Web Developer

Apr 2024 - Present

- Developed and maintained scalable, database-driven PHP web applications using Core PHP and MySQL, ensuring reliability and smooth functionality.
- Designed and implemented responsive, user-friendly interfaces using HTML, CSS, Bootstrap, and JavaScript to support multiple devices and browsers.
- Implemented complete CRUD operations, server-side form validation, user authentication, and secure session management for data integrity and security.
- Designed, optimized, and managed MySQL databases, improving query performance and efficient data retrieval.
- Integrated third-party libraries and APIs to extend application features and enhance overall system functionality.

CODTECH IT SOLUTIONS — Web Developer Intern

Jan 2024 - Feb 2024

- connectivity, gaining hands-on experience in real-world development workflows.
- Debugged issues, tested features, and supported senior developers in delivering functional and responsive websites on time.

EDUCATION

Year	Degree	Institute
2020 - 23	Bachelor of Engineering	RTMNU, Nagpur

TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS3, Bootstrap, JavaScript, jQuery, SASS — for building responsive and user-friendly interfaces
Backend Technologies: Core PHP, MySQL — for server-side logic, database management, and dynamic web applications
Libraries & Tools: Git (basic version control), cPanel, Web Hosting
Development Concepts:CRUD Operations, Authentication & Authorization, Role-Based Access Control, Server-Side Form Validation, SEO-Friendly Development, Cross-Browser Compatibility

CERTIFICATIONS

Full Stack Development - Webgurukul (Sep 2023 - Jan 2024)
CODTECH IT SOLUTIONS (Jan 2024 - Feb 2024)
Purple Page Three - Intern (May 2021 - Aug 2024)
