PROFESSIONAL SUMMERY

- Accomplished professional experience in **Dotnet** and **My SQL Server**.
- Ingenious in **development**, **Unit Testing** and **Deployment** throughout software development life cycle.
- Proposed business work flow **improvements** which **increased** performance and provided more transparency to end users.
- Expert in Agile/Scrum – participating cross team activities, spring planning, and retrospective.
- Passionate about learning new technologies and enhancing technical skills to contribute effectively to organizational growth.
- Dedicated to delivering solutions that drive efficiency, scalability, and user satisfaction across projects.

SKILLS

- | | | | |
|-----------------------------------|------------------|--------------------|----------------------|
| • Asp.net | • ASP.NET MVC | • ASP.NET Core | • .NET Web APIs |
| • ASP.NET Razor | • .Net Framework | • Entity Framework | • C# |
| • Radzen Blazor | • Bootstrap | • HTML/HTML5 | • Css/Css3 |
| • JavaScript | • MS SQL | • OOPs concepts | • Visual Studio 2022 |
| • Microsoft SQL Management studio | | • GitHub/Git | • Trello |

EXPERIENCE

Junior Software Developer

Just Codify, Ahmedabad , India

04/2024 – Present

Project: Banking, Financing Stage Management App - YHP, Brunei

Role: Full Stack Developer

Overview:

- This project provides comprehensive banking and financing facility management for law firms, delivering high-quality services across all areas of legal practice.
- We manage financing stages linked to lawyers' files, enhancing scalability, flexibility, and ease of management, while optimizing file access and improving overall performance.
- We provided strong database support to resolve stage-related issues.
- Detected, analyzed, and resolved bugs reported by business users, ensuring smooth system performance and enhanced user satisfaction.
- Actively involved in all phases of project discussions and workflow processes.

Responsibilities:

- Application Development: Develop UI and Action methods and services using ASP.NET. Designed and implemented backend logic, managed database interactions, and created server-side components, contributing to a 30% increase in system efficiency.
- Collaboration and Communication: Fostered collaboration between development, operations, and architecture teams to ensure seamless integration and progress, resulting in a 40% improvement in issue resolution time.
- Performance Optimization: Monitored and optimized application performance through caching, indexing, and query optimization techniques, leading to a 30% reduction in server response time.
- Testing and Quality Assurance: Conducted manual unit and integration tests to ensure code quality and system reliability, which reduced post- deployment bugs by 40%.
- Deployment: Managed the end-to-end deployment of web applications across development, staging, and production environments. Monitored applications post-deployment to ensure smooth operation and error-free operation.

- During my internship, I developed strong skills in HTML5, learning how to structure web pages with semantic and accessible code.
- I enhanced my ability to style and design responsive, visually appealing websites using advanced CSS3 techniques.
- Throughout my internship, I strengthened my JavaScript knowledge by implementing interactive features like form validation, dynamic content updates, and handling user events to enhance web functionality.
- By using the Bootstrap framework, I effectively sped up the development process, applying its grid system, responsive utilities, and pre-designed components to create clean and professional web interfaces.

EDUCATION

- Veer Narmad South Gujarat University 2020-2023
Bachelor of Computer Applications (BCA)

Languages

- English, Hindi, Gujarati
