

PRITI SHELKE

Software Developer

✉ shelkepriti26@gmail.com 📞 +91-9172060310

PROFILE SUMMARY

Software Developer with 1.7+ years of professional experience in planning, enhancing, and maintaining web and desktop applications. Skilled in building scalable, responsive, and feature-rich applications using C#, ASP.NET MVC, Web Forms, ADO.NET, Entity Framework, SQL Server, and Angular. Proficient in full SDLC processes including requirement analysis, design, enhancement, testing, and deployment in Agile environments. Experienced in UI/UX development, database design, writing streamlined queries and stored procedures, and executing unit testing and bug fixing. Strong team player with experience collaborating with cross-functional teams to deliver high-quality software solutions on time.

TECHNICAL SKILLS

Programming Languages: C#, JavaScript, TypeScript, SQL

Frontend Technologies: HTML5, CSS3, Bootstrap, jQuery, AJAX, Angular

Backend Technologies: ASP.NET WinForms, ASP.NET Web Forms, ASP.NET MVC, .NET Core, ADO.NET, Web API, Entity Framework, Entity Framework Core, LINQ

Database Systems: Microsoft SQL Server

Development Tools: Visual Studio, Visual Studio Code, SQL Server Management Studio (SSMS), GIT

Other Skills: RESTful API Development, Debugging, Error Handling, Data Binding, Unit Testing, Responsive UI Design

EXPERIENCE

Software Developer

Jul 2024 – Present

Sumeru Infotech, Pune

Roles and Responsibilities:

- Actively participated in the Software Development Life Cycle (SDLC) using Agile methodology, including requirement analysis, sprint planning, daily stand-ups, development, testing, and deployment.
- Planned, expanded, and maintained web applications using ASP.NET MVC / ASP.NET Core and desktop applications using ASP.NET WinForms, ensuring scalability, security, and performance.
- Created dynamic, responsive, and user-friendly UI/UX using HTML, CSS, Bootstrap, JavaScript, jQuery, and AJAX.
- Applied business logic and data access layers using C#, ADO.NET, Entity Framework, and LINQ following MVC and layered architecture principles.
- Created and streamlined SQL Server databases, including tables, relationships, indexes, stored procedures, views, and triggers for efficient data handling.
- Performed unit testing, debugging, and issue resolution to ensure code quality and application stability.
- Participated in code reviews, technical documentation, and continuous improvement activities.
- Integrated RESTful APIs and backend services to enable smooth communication between frontend and backend systems.
- Ensured adherence to coding standards, security best practices, and performance enhancement techniques.
- Collaborated closely with cross-functional teams including QA, designers, and project managers to understand requirements and deliver features within deadlines.
- Assisted in deployment activities, version control management, and post-deployment support.
- Analyzed and resolved production issues and performance bottlenecks to improve system reliability and user satisfaction.

PROJECTS

Society Ease

Role: Team Member

Technologies Used: C#, ASP.NET Core, Angular, ADO.NET, HTML, CSS, Bootstrap, jQuery, JavaScript, AJAX, SQL Server

- Created a web-based Society Management System to manage society operations efficiently.
- Executed modules including maintenance bill generation, complaint registration, visitor management, notice board updates, meeting scheduling, and document management.
- Expanded the accounting module to handle expense tracking, vendor payments, income management, monthly billing, payment reminders, and financial reporting.
- Enforced role-based access control for Superadmin, Chairman, Secretary, Resident, Security, and Accountant with dashboards showing real-time reports and analytics.
- Used ADO.NET and SQL Server for CRUD operations, improved queries, and stored procedures for better performance and data integrity.
- Created a responsive and interactive UI using Bootstrap and Angular components for seamless user experience across devices.

Self Zone

Role: Team Member

Technologies Used: C#, ASP.NET MVC, ADO.NET, HTML, CSS, Bootstrap, jQuery, JavaScript, AJAX, SQL Server

- Created a web-based Visitor Management System to manage visitor appointments and entry records efficiently.
- Executed visitor appointment scheduling and pre-registration features to streamline guest entry processes.
- Planned and integrated secure authentication and authorization for Admin and Receptionist roles.
- Applied real-time notifications to alert administrators and reception staff about visitor arrivals and updates.
- Created a responsive and user-friendly UI and used enhanced SQL Server queries and stored procedures for efficient data management.

Stay Track

Role: Team Member

Technologies Used: C#, Windows Forms, ADO.NET, SQL Server

- Created a desktop-based Homestay Management System using C# Windows Forms for bookings, room management, and staff coordination.
- Executed room management features including room creation, pricing setup, availability tracking, and maintenance status updates.
- Expanded booking management modules for receptionists to handle guest check-in, check-out, and real-time occupancy tracking.
- Created employee and feedback modules to manage staff details, roles, attendance, access permissions, and collect guest feedback.
- Used ADO.NET and SQL Server for CRUD operations, streamlined queries, stored procedures, and report generation to maintain data integrity.

EDUCATION

Bachelor of Computer Science (SPPU)

2024

DECLARATION

I confirm that all the information given above is true and reflects my skills and experience in software development. I am committed to learning new things and contributing positively to future projects.
