PROFILE

Motivated Full Stack Developer with hands-on experience in building web applications using ASP.NET, SQL Server, HTML, CSS, and JavaScript. Skilled in delivering user-focused solutions through agile development and strong problem-solving abilities. Eager to contribute technical expertise and adaptability to innovative software projects.

CERTIFICATION

FULL STACK DEVELOPER COURSE • JULY 2025
ITpreneur • NAGPUR

Mastered web development, database management, and secure coding practices.

PROJECTS

PROJECT NAME: MY SHOP

Technologies: ASP.NET, SQL Server, ADO.NET, C#

- Developed a dynamic web application for user management and product transactions, implementing secure CRUD operations with ADO.NET.
- Optimized SQL queries to improve data retrieval performance by 20%, enhancing user experience.
- Designed responsive UI with ASP.NET controls, ensuring compatibility across devices.

INDIAMART CLONE

Technologies: HTML, CSS, JavaScript, JSON Server

- Built Indiamart-inspired web app with CRUD operations for product management.
- Created Admin Dashboard for product add/update/delete and managed mock data with JSON Server for seamless API integration.
- Enhanced UI/UX with CSS3, achieving cross-browser compatibility and mobile responsiveness.
