Backend:	.NET, .NET Core
Databases:	SQL Server, PostgreSQL, MySQL
Version Control:	Git
Tools:	Visual Studio, VS Code
Other:	REST API Development, Agile Scrum, Debugging & Troubleshooting

PROFESSIONAL EXPERIENCE

Full Stack Developer Sept 2023 – Present
SmartData Enterprises, Nagpur, India

- Developed enterprise applications using .NET, Angular, React, and SQL-based databases.
- Built and maintained REST APIs for backend services and integrated them with front-end applications.
- Designed reusable UI components, improving user experience and performance.
- Worked with SQL Server, PostgreSQL, and MySQL to create and optimize database queries.
- Collaborated with cross-functional teams in an Agile environment to deliver high-quality features.
- Participated in code reviews, testing, and debugging to ensure stable and scalable software solutions.

KEY PROJECTS

Workforce Management System Tech Stack: .NET, Angular, SQL Server

- Created modules for workforce scheduling, task management, and employee tracking.
- Developed secure backend APIs and integrated them with Angular components.
- Improved data retrieval speed through optimized SQL queries.

Property Management System Tech Stack: .NET, Angular, PostgreSQL

- Built features for tenant management, property catalog, and maintenance workflows.
- Designed database schemas and implemented CRUD operations using PostgreSQL.
- Enhanced UI workflows to improve user navigation and data accessibility.

Healthcare Management Platform Tech Stack: React, .NET, MySQL

- Developed patient management and appointment scheduling features.
- Integrated React front-end with .NET backend services.
- Ensured secure data handling and optimized service performance.
