

Shreya Shrivastava

Noida • 7415530008 • shreyashrivastava0803@gmail.com

Software Engineer

Software Engineer with more than 3 years of experience, specializing in backend development using .NET. Skilled in building reliable, scalable systems and resolving frontend issues across React, Angular, and MVC. Focused on clean code and continuous improvement.

WORK EXPERIENCE

Indus Valley Partners

Software Engineer

08/2025 - Present

Noida, India

- Resolved multiple critical production issues by identifying API bottlenecks and optimizing backend workflows, improving reliability and reducing response time.
- Developed high-performance .NET Core APIs powering micro-frontend workflows.
- Developed an automated .NET 8 migration tool for MySQL → SQL Server, cutting manual work by 95% and improving accuracy with scripted batch execution.
- Increased test coverage by ~12% through xUnit-based automation, reducing regressions and improving release stability.

Procurement Partners

Software Engineer

11/2023 - 08/2025

Noida, India

- Designed and deployed two scalable microservices using .NET Core and MongoDB, improving service isolation and reducing coupling across the platform.
- Implemented secure authentication flows for internal microservices, strengthening overall system security and request validation.
- Identified and fixed customer-impacting issues across backend APIs and UI frameworks (React, Angular, MVC), reducing repeat incidents and enhancing system stability and user experience.
- Built interactive DOMO dashboards used by business teams, improving data visibility and reducing manual reporting time by 70%.
- Maintained and enhanced SQL Server RDL reports to support evolving business and customer reporting needs.
- Created and refined regex-based PDF parsing templates to extract structured invoice data.
- Actively participated in Agile ceremonies and used Jira for sprint planning, tracking, and issue resolution.

Yash Technologies

Programmer

07/2022 - 11/2023

Indore,India

- Built full-stack applications using ASP.NET MVC, C#, Web API, ADO.NET, Angular, and MS SQL Server, including writing SQL queries and stored procedures.
- Developed an admin panel with Web API and created responsive UI screens using Angular Material and reactive forms for real-time validation.

SKILLS

- ADO.net
 - Angular 2+
 - Asp.net
 - C#
 - CI/CD
 - CQRS
 - Docker
 - Entity Framework
- LINQ
 - Microservices
 - Microsoft SQL Server
 - MongoDB
 - MVC(Model-View-Controller)
 - .Net 8
 - .Net Framework 4.8
 - .Net MVC
- .Net Web API
 - Rabbit MQ
 - REST API
 - Stored Procedures
 - TypeScript
 - Visual Studio
 - Webhook
 - XUnit

EDUCATION

Samrat Ashok Technological Institute • Bachelor of Technology in Computer Science

08/2018 - 06/2022
