PROJECT

AI-Powered Resume Builder

- Built a web-based application that allows users to create professional resumes with AI-driven content suggestions.
- Implemented role-based authentication, modular data entry (personal info, education, experience, skills), and PDF export functionality. Designed a responsive UI and used Entity Framework for seamless CRUD operations.
- Deployed on IIS for testing and demonstration.
- Tech Stack: ASP.NET MVC 5, C#, Entity Framework (Code-First), SQL Server, Bootstrap, jQuery, AJAX, iTextSharp (or similar library) for PDF generation.
- Role-Based Authentication: Implemented secure login for users and admin using ASP.NET Identity.
- PDF Resume Export: Developed functionality to generate downloadable resumes in PDF and Word format.

EXPERIENCE

Software Developer – .NET Developer

ATTUNE TECHNOLOGY, Bangalore | Apr2024 – Present

Technologies: ASP.NET MVC, WebForms, Web API, C#, SQL Server, JavaScript, Bootstrap, HTML/CSS, Git.

- Developed and maintained web applications using ASP.NET MVC and WebForms, ensuring modular and maintainable code.
- Designed RESTful APIs using ASP.NET Web API for seamless integration between front-end and back-end systems.
- Wrote complex SQL queries, stored procedures, and function for data operations in SQL Server.
- Implemented user interfaces using Bootstrap and JavaScript for responsive and interactive web design.
