WORK EXPERIENCE

WORDPRESS DEVELOPER | Innovate Touch – Digital Marketing & IT Solutions, Nagpur

Feb 2025 – Present

Internship: Aug 2024 – Jan 2025

- Developed, customized, and maintained WordPress websites using Elementor, themes, and plugins.
- Worked on UI/UX improvements, responsive layouts, and client-specific website requirements.
- Assisted in building and deploying websites during the internship phase, gaining hands-on industry experience.
- Currently handling end-to-end WordPress development, including site creation, updates, performance optimization, and security.
- Collaborating with digital marketing teams to create landing pages for campaigns, promotions, and lead generation.
- Managing hosting, backups, troubleshooting, and ongoing website support for multiple client projects.

SOFTWARE DEVELOPMENT ENGINEER | Hubnex Lab's, Gurugram

Mar 2024 – Aug 2024

- Developed and maintained scalable web applications using Java, Spring Boot, and SQL.
- Collaborated with cross-functional teams to build responsive UI using React.js and Bootstrap.
- Participated in code reviews and implemented RESTful APIs for seamless client-server communication.
- Managed project deployment cycles and ensured efficient database integration.
- Gained hands-on experience in version control systems and agile development methodology.

PROJECTS

SMART HEALTH CARE MANAGEMENT SYSTEM

Organization: N2R Technologies, Nagpur

Technologies: ASP.NET, C#, HTML, CSS, JavaScript, Bootstrap, SQL Server

- Designed and developed a Smart Health Care Management System to streamline hospital and clinic operations.
- Implemented a secure authentication system with role-based login for Admin, Doctor, and Staff.
- Developed an Admin Dashboard to manage doctors, patients, appointments, and blood bank records.
- Created a Doctor Module allowing doctors to view patient details and accept or reject appointments.
- Built a Blood Bank Management module to maintain donor information, blood group availability, and requests.
- Designed responsive and user-friendly interfaces using Bootstrap for cross-device compatibility.
- Integrated backend logic using ASP.NET and SQL Server for efficient data handling and security.
- Applied validation, session management, and error handling to ensure system reliability and performance.

EMPLOYEE MANAGEMENT SYSTEM

Organization: ARC Technologies, Nagpur

Technologies: React.js, Core Java, Spring Boot, REST APIs, HTML, CSS, SQL Server

- Developed a web-based Employee Management System to manage employee records and internal operations.
- Built a responsive frontend using React.js, HTML, CSS, enabling smooth user interaction and data handling.
- Designed and implemented RESTful APIs using Spring Boot and Core Java for CRUD operations.
- Implemented core modules including Employee Registration, Profile Management, Department Management, and Status Tracking.
- Integrated SQL Server database for secure and structured data storage.
- Applied API-based communication between frontend and backend to ensure scalability and clean architecture.
- Implemented form validation, error handling, and basic authentication for system security.
- Followed MVC architecture and best coding practices to improve maintainability.

CERTIFICATIONS

FULLSTACK DEVELOPER | ARC Technologies and Institutions, Nagpur

Mar 2023 – Sep 2023

- Worked on full stack development using HTML, CSS, JavaScript, and React.js on the front end.
- Developed RESTful APIs using Node.js and integrated with MySQL databases.
- Implemented CRUD operations and API integrations for a real-time student management system.
- Collaborated on feature design and implementation with internal teams.

DOT NET DEVELOPER | N2R Technologies, Nagpur

Jan 2022 – May 2022

- Developed and enhanced web and desktop applications using ASP.NET, C#, and .NET Framework.
 - Created dynamic pages with server-side scripting, interacting with SQL Server databases.
 - Worked on Windows Forms and Web Forms to build user-centric applications.
 - Applied OOP principles in application development, improving maintainability and modular design.
 - Debugged, tested, and maintained code, ensuring high performance and compliance with best practices.
-
